PROFESSIONAL SUMMARY

B.Pharm graduate (RGUHS, 2025) pursuing an M.Pharm in Pharmacy Practice at RIPER, Anantapur, with experience in literature review, evidence synthesis, medical writing, patient-education content and healthcare communication. Co-authored a comparative telepharmacy literature review and presented a poster at a pharmacy conference. Certified in AI in Pharma (Skill India / NSQF Level 5), with additional experience applying AI and digital tools to healthcare education. Seeking entry-level clinical research opportunities.

CORE COMPETENCIES

Clinical Research Readiness	Literature review and synthesis, comparative outcome analysis, structured medical writing, evidence appraisal, research documentation
Pharmacy Practice and Patient Care	Patient-counselling content, health simplification, adherence communication, telepharmacy concepts, digital health engagement
Medical and Scientific Communication	Pharmacology writing, research poster presentation, academic content architecture, AI-assisted literature support
AI and Research Tools	Literature searching, evidence synthesis, documentation, data handling, scientific writing, research methodology, GCP, regulatory knowledge
Technical and Documentation	Structured content management, process documentation, data annotation readiness, no-code automation
Languages (clinical asset)	Kannada (native), English (professional), Hindi, Telugu, Tamil — vernacular patient-communication capability

EDUCATION

Master of Pharmacy (M.Pharm) — Pharmacy Practice *Oct 2026 – Present*
Raghavendra Institute of Pharmaceutical Education and Research (RIPER), Anantapur | JNTUA | autonomous campus
Focus areas aligned with clinical pharmacy, patient-centred care, evidence-based practice and research methodology.

Bachelor of Pharmacy (B.Pharm) *2021 – 2025*
Priyadarshini College of Pharmacy, Koratagere | RGUHS, Karnataka | CGPA 7.2 / 10

Pre-University — PCMB *2018 – 2020*
Satyam International School and PU College, Ballari, Karnataka | 81.45%

RESEARCH AND KEY PROJECTS

Telepharmacy Research Project | Comparative Literature Review ***2025***
RGUHS final-year dissertation, submitted as a five-student group project. My contribution was the literature search strategy and screening, the evidence synthesis, the write-up and the presentation.
“Patient Satisfaction and Counseling Effectiveness in Telepharmacy: A Comparative Literature Review of Remote vs. Face-to-Face”

- Conducted a structured comparative analysis of remote versus in-person pharmacy counselling outcomes — directly relevant to digital clinical research, telehealth trial design and patient-reported outcomes.
- Identified patient-engagement drivers and adherence factors in digital pharmacy settings, and produced recommendations applicable to clinical service integration.
- Applied core clinical-research methods: literature search strategy, critical appraisal, data synthesis, structured medical writing and evidence-based communication.

Research and Scientific Communication | PharmaNEST 3.E, Ooty ***2022***

- Presented a poster on nanoparticle drug-delivery systems to a multi-institutional audience, and received an award recognition among peer presenters.
- Demonstrated scientific communication, research documentation and conference-level presentation skills.

Medical Writing Sample | AI Patient-Education Narrative Review ***2026***

- Narrative review written during a junior medical-writing internship: literature research, evidence synthesis, topic development and structured healthcare content planning.

Healthcare Portfolio Website | Independent build ***2026***

- Designed, built and deployed a responsive multi-page portfolio covering pharmacy, research and digital-health work, in hand-written HTML, CSS and JavaScript hosted on GitHub Pages.
- Applied structured content architecture, accessibility and progressive enhancement, with a link-checking CI gate so that broken internal references fail the build.

EXPERIENCE

Medical Writer — YuvaIntern (Henry Harvin) *Jul 2026 – Aug 2026*

- Junior medical-writing internship: medical literature research, evidence synthesis, topic development and structured healthcare content planning.

Internship Trainee — KS Hospital *Jan 2026 – Feb 2026*

- Junior pharmacist across purchase, inventory and clinical data management.
- Built and maintained a master database of 750+ pharmaceutical products — generic compositions, brand names, manufacturers, dosage forms, strengths and routes of administration.
- Supported Medication Management and Use (MMU) documentation aligned with NABH 6th Edition standards.

Founder and Builder — TechStudyHubCore *Apr 2026 – Oct 2026 · archived*

- Built, alone, a learning ecosystem for pharmacy, nursing and school-level students, including a structured B.Pharm architecture, SSLC content and a CGPA/SGPA calculator on the PCI 2026 syllabus.
- Designed the S.M.I.L.E. framework, a vernacular health-education visual system prioritising Kannada and regional-language learners.
- Retired the public infrastructure deliberately rather than let it decay; the engineering record is archived on GitHub.

Digital Setup — freelance *Ongoing*

- Builds local businesses a digital presence they own: landing page, WhatsApp contact, Google and maps presence, and the local-search basics that make a business findable.

Academic mentoring and lectures — junior students *Ongoing*

- Delivered lectures and mentoring sessions for junior students across several departments, in person and online, as academic curriculum support.
